## **UI/UX Design Protection Statement**

The user interface (UI) and user experience (UX) designs, including but not limited to screen layouts, navigation flows, visual elements, icons, typography, and color schemes contained in this document, are the intellectual property of Capesso.

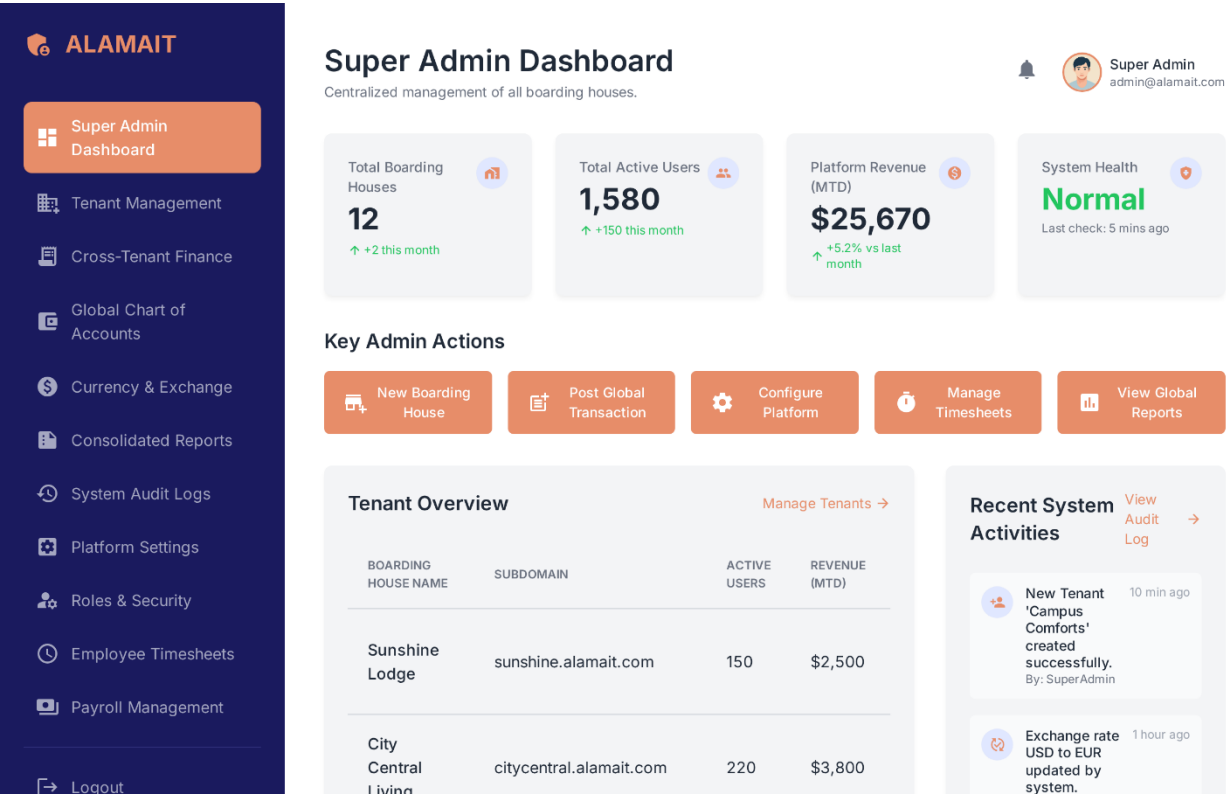

These designs are protected under applicable copyright, trade dress, and intellectual property laws. Unauthorized reproduction, distribution, modification, or disclosure of any part of this design—whether in whole or in part—is strictly prohibited without prior written consent from Capesso.

This document is intended solely for the purpose of evaluating or collaborating on the development of the system described herein and must not be shared with third parties outside of the agreed scope.

# **DormX – University Student Boarding Management Solution**

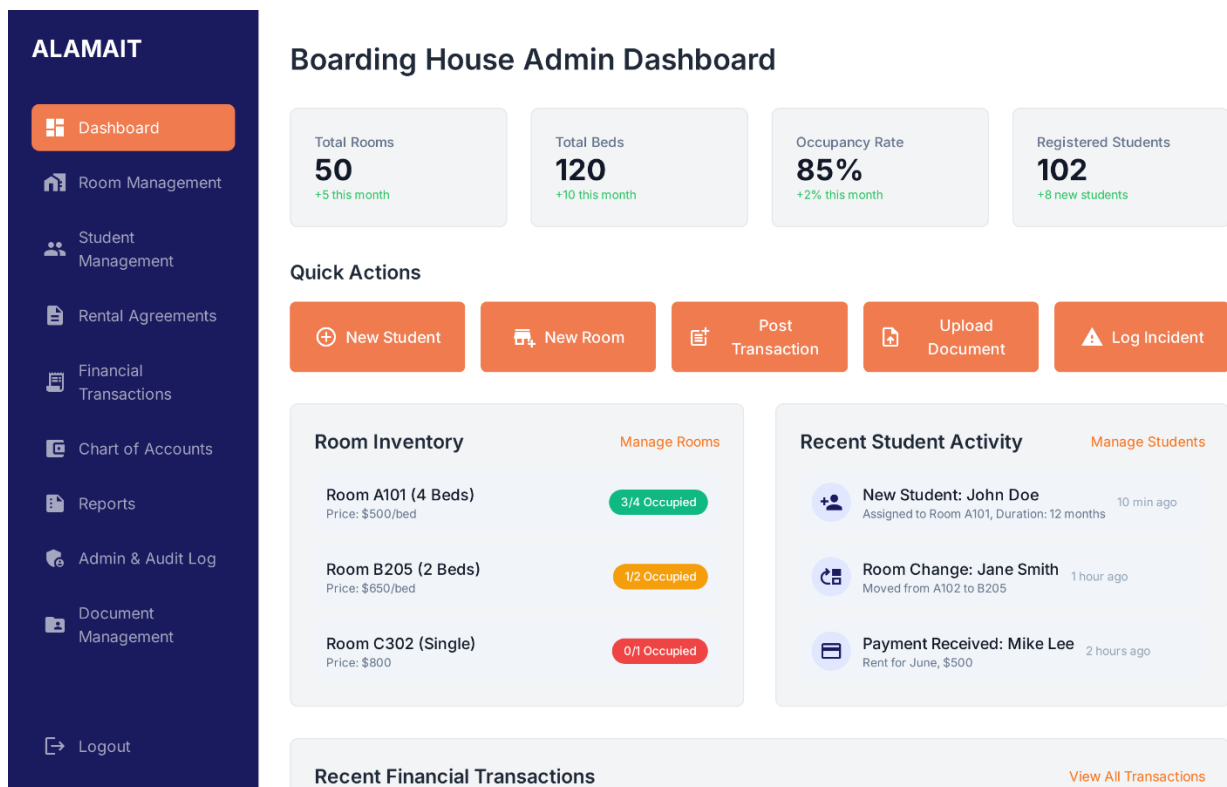

DormX is a modern, intelligent boarding management solution tailored for university and tertiary students. It streamlines the operational, administrative, and welfare aspects of student accommodation through a flexible, user-centric interface. Designed for institutions aiming to offer structured yet engaging student housing, DormX enhances accountability, communication, and overall student experience.

# 1.SUPER ADMIN DASHBOARD

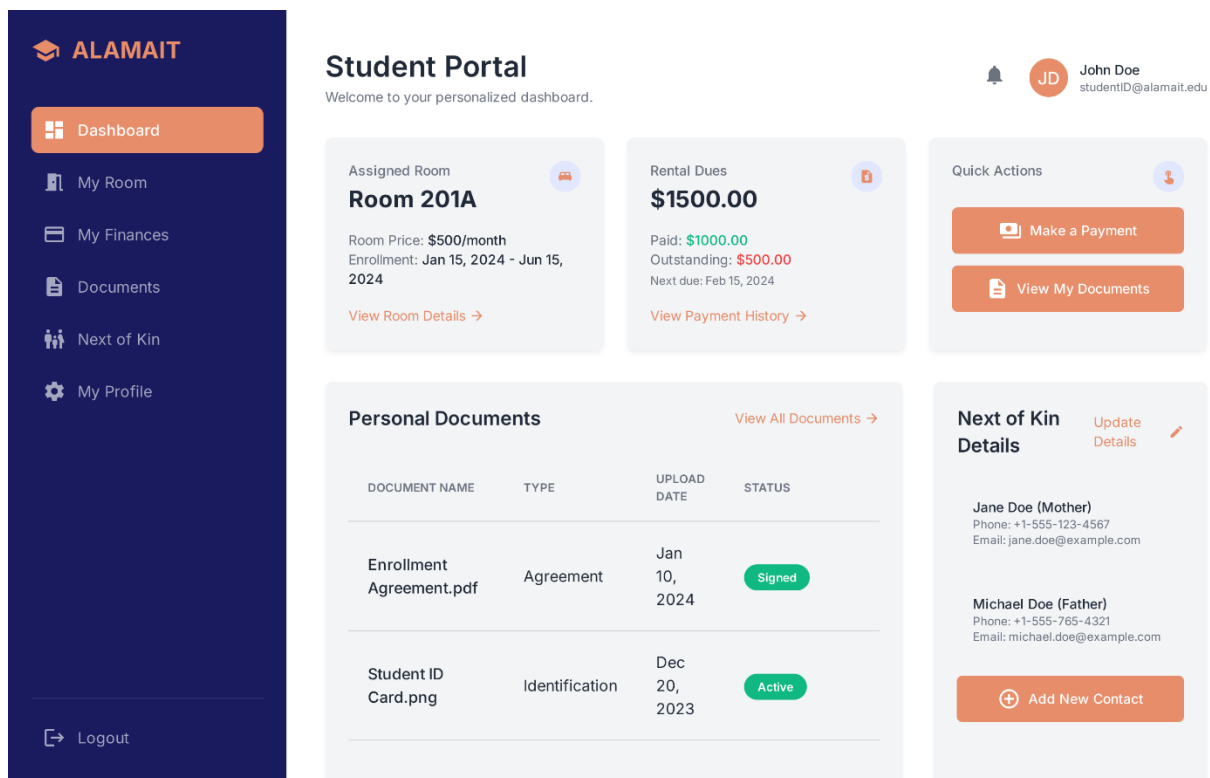

This dashboard provides a comprehensive control center for the system’s highest-level administrator. It offers an at-a-glance view of critical information such as boarding house statuses, student distribution, and system notifications. The interface is designed to empower decision-makers with actionable insights and easy navigation to key modules such as user management, system configuration, and reporting.

## 2. BOARDING HOUSE ADMIN DASHBOARD

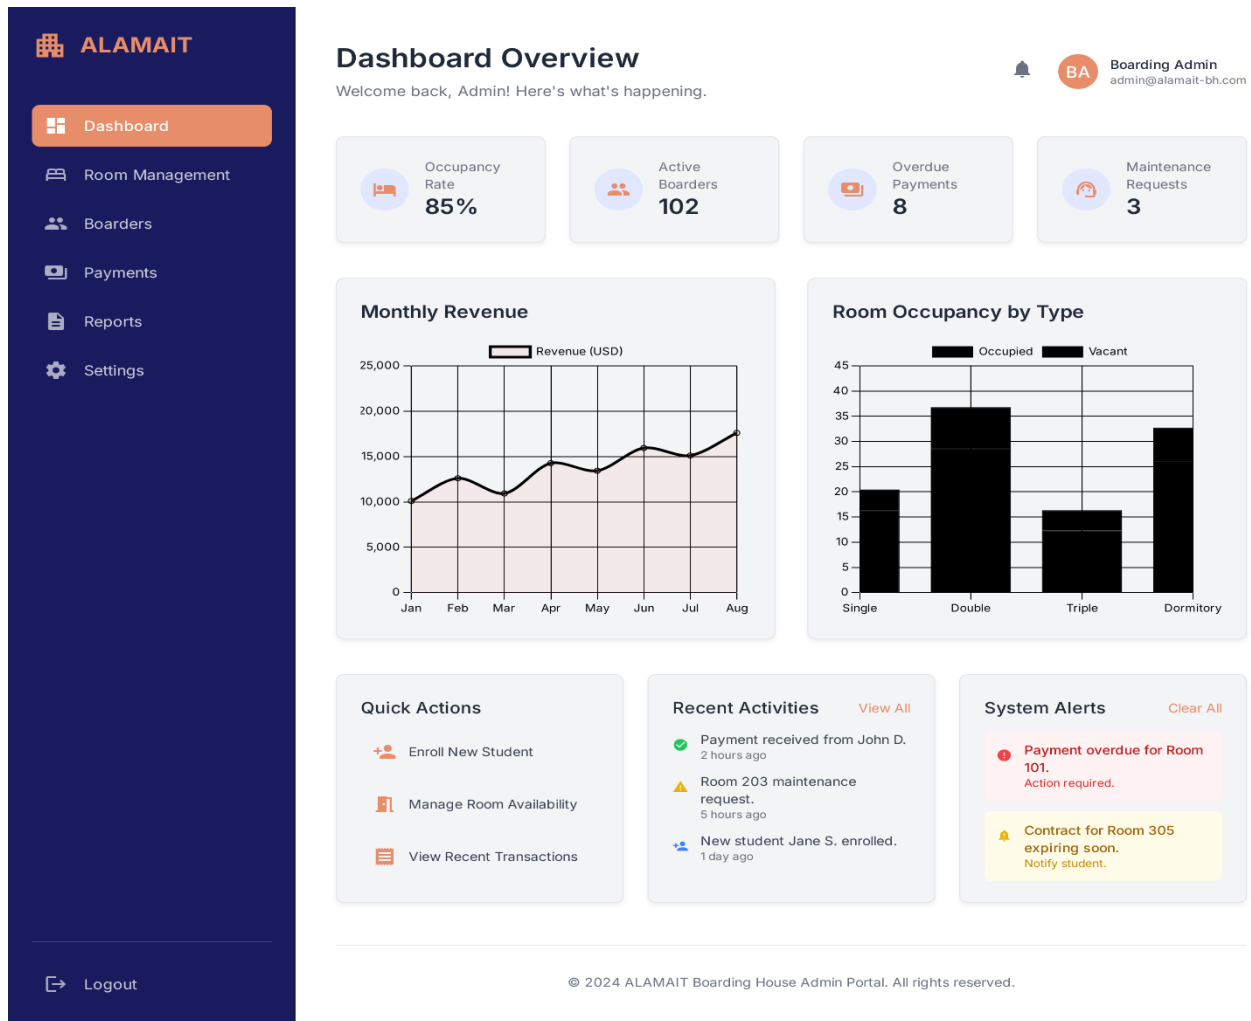

Tailored specifically for house administrators, this dashboard simplifies the day-to-day management of students and rooms. The UI offers quick access to student attendance, room allocation, behavior tracking, and internal communication tools. By focusing on usability and efficiency, it supports house admins in maintaining a well-organized and responsive boarding environment.

### 3.STUDENT PORTAL

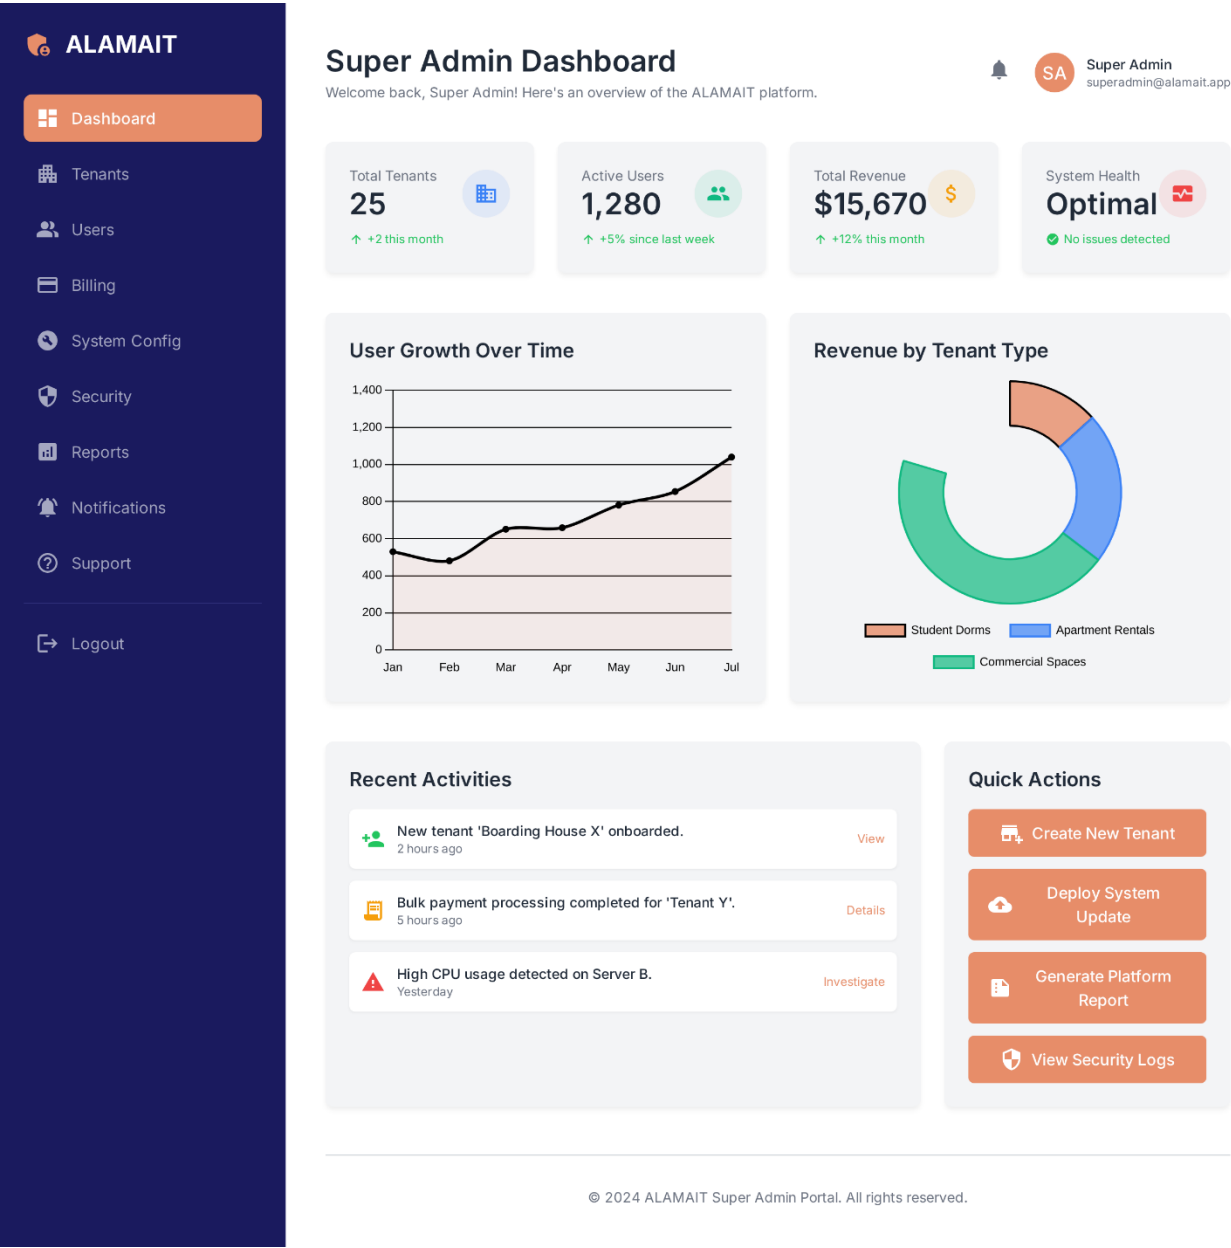

Designed with students in mind, this portal provides a personalized and user-friendly space where students can view their boarding details, receive updates, and access important communications. The layout ensures students are always informed and empowered to interact responsibly within the boarding school system. It promotes a sense of inclusion and digital literacy.

## 4.BOARDING HOUSE ADMIN PORTAL

This portal extends the admin dashboard with more granular control and data entry capabilities. Boarding house admins can add or discharge students, assign rooms, log behavioural records, and generate custom reports. The interface is structured to reduce errors, streamline workflow, and support accountability in managing student welfare.

5.SUPER ADMIN PORTAL

This advanced portal provides full system oversight and administrative capabilities. It allows the Super Admin to manage user roles, configure policies, monitor school-wide boarding operations, and generate high-level reports. The UI emphasizes security, scalability, and adaptability, ensuring the system remains robust and future-ready
